QITL-4 Program

Mon 28 March 2011 – Pre-Conference Workshop

0900-0930	Registration	
0930-0945	Welcome	Reinhold Kliegl & Alexander Geyken
0945-1045	Plenary Talk: Resource requirements for neo-generative modeling in (psycho)linguistics	R. Harald Baayen
1045-1115	Coffee break	
1115-1150	Towards exploring the specific influences of wordform frequency, lemma frequency and OLD20 on visual word recognition and reading aloud	Lara Kresse, Stefan Kirschner, Stefanie Dipper, Eva Belke
1150-1225	An evaluation of the Google Books ngrams for psycholinguistic research	Emmanuel Keuleers, Marc Brysbaert, Boris New
1225-1400	Lunch	
1400-1445	dlexDB in Depth	Julian Heister, Edmund Pohl, Kay-Michael Würzner
1445-1515	Coffee break	
1515-1550	Corpus-based evidence for approximating semantic transparency of complex verbs	Heike Zinsmeister, Eva Smolka
1550-1625	Psycholinguistic databases in research on emotional processing	Benny Briesemeister
1625-1630	Closing Remarks	
From 1900	Warming up (Aufsturz, Oranienburgerstr. 67)	

Tue 29 March 2011

0900-0930	Registration	
0930-0945	Welcome	Anke Lüdeling & Amir Zeldes
0945-1045	Plenary Talk: Corpus-Based Generation of Linguistic Hypotheses using Quantitative Methods	Hermann Moisl
1045-1115	Coffee break	
1115-1155	Discourse-linking and long-distance syntactic dependency formation	Oliver Boxell
1155-1235	Multiple Fronting vs. VP Fronting in German	Felix Bildhauer, Philippa Cook
1235-1400	Lunch	
1400-1440	Modeling reduction of is, am and are in grammaticalized constructions	Danielle Barth
1440-1520	Color naming universals: a statistical approach	Gerhard Jäger
1520-1550	Coffee break	
1550-1630	Semantic factors in the choice between ethnic adjectives and PP counterparts: Quantitative evidence	Daniel Berndt, Gemma Boleda, Berit Gehrke, Louise McNally
1630-1710	Meaning-shifting plurality and the Count/Mass Distinction	E. Graham Katz, Roberto Zamparelli

Wed 30 March 2011

0930-1030	Plenary Talk: Compound Stress Assignment Emerges from the Lexicon	Ingo Plag
1030-1100	Coffee break	
1100-1140	Statistical classification and principles of human learning	R. Harald Baayen, Antti Arppe
1140-1220	From graded ratings to binary decisions: A case study on argument alternations in German	Markus Bader, Jana Häussler
1220-1400	Lunch	
1400-1440	Definite reference is not always based on salience	Peter Bosch, Sascha Alexeyenko, Kirsten Brukamp, Maria Cieschinger, Xiaoye Deng, Peter König
1440-1520	Reference resolution in Chinese: New insights from psycholinguistics	Xiao He, Elsi Kaiser
From 1520	Poster session with coffee (see list of presentations below)	
From 1900	Conference dinner (Ampelmann Restaurant, Stadtbahnbogen 159)	

Thu 31 March 2011

0930-1030	Plenary Talk: What Counts? the Graded Nature of Rule Abstraction in Child Language	Heike Behrens
1030-1100	Coffee break	
1100-1140	Stylometry and the interplay of topic and L1 in the different annotation layers in the FALKO corpus	Felix Golcher, Marc Reznicek
1140-1220	The Acquisition of English Particle Placement: A case study in developing productivity	Benjamin J. Molineaux
1220-1400	Lunch	
1400-1440	A Quantitative Approach to the Contrast and Stability of Sounds	Thomas Mayer, Christian Rohrdantz, Frans Plank, Miriam Butt, Daniel A. Keim
1440-1520	Reconstructing meaning change from parallel corpora	Michael Cysouw, Jelena Prokić
1520-1550	Coffee break	
1550-1630	The use of spatial autocorrelation statistics for the analysis of regional linguistic variation	Jack Grieve
1630-1700	Final Discussion & Closing	Anke Lüdeling & Amir Zeldes

Poster Presentations

Shades of salience: Multivariate analysis of prototypicality effects in color terms	Alena Anishchanka, Natalia Levshina,Dirk Speelman, Dirk Geeraerts
Subject inversion in Romance: a corpus-based study	Lisa Brunetti, Stefan Bott
Watching language change: A new visualization technique and its theoretical implications	Martin Hilpert
Rhythm-syntax interaction in silent reading	Gerrit Kentner
Maximum parsimony method in the subgrouping of Dravidian languages	Sudheer Kolachina, Taraka Rama, Lakshmi Bai B.
Developing productivity with a new construction: Are there frequency effects in instructed second language acquisition (SLA)?	Karin Madlener
Can the asymmetric effect of implicit causality be explained through usage patterns?	Paul Metzner
Proving poverties of the stimulus wrong: A computational and corpus-based case in point	Hagen Peukert
Aggregating and interpreting lexical alternation variables. Benefits of Weighted Multidimensional Scaling for lectal categorization	Tom Ruette, Dirk Speelman, Dirk Geeraerts
Measuring semantic change: The case of Spanish participial constructions	Cristina Sánchez-Marco, Stefan Evert
Effects of complexity on the acceptability of long-distance wh-dependencies	Ankelien Schippers and Machteld Brands
The quantitative approach to morphological productivity in a diachronic perspective	Pavel Štichauer
In a land far, far away…The dative alternation in British, American and Australian English	Daphne Theijssen, Joan Bresnan, Marilyn Ford
A concept-based approach to measuring the success of loanwords	Eline Zenner, Dirk Speelman, Dirk Geeraerts
